Features

Call Center

Our cloud-based call center features provide your company with complete flexibility and your company's callers with an enhanced customer experience.

Text Messaging

Send and receive text messages from your business phone number.

Mobile and Desktop App

Our powerful VoIP mobile and desktop apps (VoIPCloudConnect) offers state-of-the-art functionality, allowing users to perform all tasks from the device they choose.

Call Recording

Ensure clarity and security with either recording all calls or only Record on Demand. Recording are accessible for 60 days.

Fax

Connect your fax machine to the Internet via an Analog Telephone Adapter (ATA), and view faxes online or via email.

Heads Up Display

World-class Heads Up Display (HUD) provides an instant view of your company's calls.

Benefits

Reliable Cloud

Our reliable cloud-based services keep your business phone system up and running 24/7.

Feature Rich

When you choose Land Computer to be your Hosted VoIP provider, you get the best in VoIP technology, including all the advanced UCaaS features, with the highest level of reliability that will cost a bundle elsewhere.

Burstable Billing

With this option, we can set a minimum and maximum number of call paths. You are then billed for the highest number of call paths used in a given month.
